**Public Workshop to Discuss the Potential Targeted Enforcement Administrative Modifications (TEAMs) Rulemaking**

***Join us December 10, 2024***

---

California Air Resources Board (CARB) staff invites you to participate in a public workshop to discuss the potential TEAMs Rulemaking. The concept of the potential TEAMs Rulemaking is targeted, administrative modifications to enhance the clarity and enforceability of five regulations.

During the workshop, CARB staff will present the concepts and solicit feedback from stakeholders. The potential TEAMs Rulemaking consists of targeted, administrative modifications to the following regulations:

1. Airborne Toxic Control Measure to Reduce Formaldehyde Emissions from Composite Wood Products;
2. California Diesel Fuel Regulations;
3. California Reformulated Gasoline Regulations;
4. Regulation for Mobile Cargo Handling Equipment at Ports and Intermodal Railyards; and the
5. Statewide Portable Equipment Registration Regulation.

**TEAMs Rulemaking Workshop**

**The workshop will be held via Zoom at the following date and time:**

Date: December 10, 2024  
Time: 10:30 am - 12:00 pm (Pacific Time)  
Location: [Zoom](#)

Interested parties must [register for the webinar](#).

## [Register](#)

After registering, you will receive a confirmation email containing information on how to join the workshop. Please use the link and password to join the workshop the morning of the meeting. Ensure the [latest version of Zoom](#) is installed on your device.

This workshop will be recorded for future viewing. The Staff presentation will be posted to the [TEAMs Rulemaking webpage](#) prior to the workshop.

---

## **Background**

The CARB Enforcement Division (ED) received feedback from stakeholders that potential targeted, administrative modifications should be made to five regulations to improve the clarity and enforceability of the regulations. ED staff, in conjunction with CARB Transportation and Toxics Division and Industrial Strategies Division, developed potential modifications to accomplish these goals.

(1) Airborne Toxic Control Measure to Reduce Formaldehyde Emissions from Composite Wood Products. The modifications aim to: add clarifying language to change the equivalence testing ranges to match U.S. EPA's ranges; remove the “bar code” option for providing compliance information on a finished good; remove the “bill of lading” option for providing a statement of compliance; and add language to clarify the compliance language is to be in English.

(2) California Diesel Fuel Regulations and (3) California Reformulated Gasoline Regulations. The modifications aim to require final blend fuel samples collected by fuel producers and importers be retained for CARB inspection.

(4) Regulation for Mobile Cargo Handling Equipment at Ports and Intermodal Rail Yards. The modifications aim to clarify the language for opacity standards and testing requirements for cargo handling equipment and remove duplicative and outdated phase-in period language.

(5) Statewide Portable Equipment Registration Regulation (PERP). The modifications aim to: add a definition of “turbine,” add a notification provision for PERP registered units operating within 1,000 feet of a school; align Tactical Support Equipment annual reporting to one year registration instead of annual reporting with three-year registration; and clarify that the registration holder may be subject to a suspension or revocation action based on the actions of a renter, lessor, third-party rental, or other authorized representative of the registration holder.

CARB staff will also accept written feedback on the workshop materials through 5:00 p.m. Pacific Time on January 3, 2025. A link to submit written feedback will be posted to the [TEAMs Rulemaking webpage](#).

## **Contact**

### **Special Accommodation Request**

The workshop will be conducted in English. If you require a special accommodation or need this document in another language or in an alternate format (i.e., Braille, large print), please contact [ED Rulemaking](#) as soon as possible, but no later than 15 business days before the scheduled webinar. TTY/TDD/Speech to Speech users may dial 711 for the California Relay Service.

### **For more information**

For more information, visit the [TEAMs Rulemaking webpage](#). If you have questions about the workshop, please contact [ED Rulemaking](#).

### **Clearing California Skies for Over 50 Years**

CARB is the lead agency for California's fight against climate change, and oversees all air pollution control efforts in the state to attain and maintain health-based air quality standards.
