Right product. Right size.

Right location. Right company.

PENROD currently stocks a large variety of core veneer products at multiple port locations in North America. In fact, PENROD goes to places in the world other companies don't go to for the materials that fulfill the needs of manufacturers.

PENROD OFFERS:

Core Veneer
Various Types of Platforms
Rotary and Sliced Faces

PENROD SOURCES PRODUCTS FROM:

North America • South America
Asia • Russia • Africa • And beyond

FIND WHAT YOU NEED WITH PENROD.

Not just another pretty sliced veneer face.

YOU'VE FOUND YOUR BEST SOURCE FOR SLICED VENEER FACES.

With a great selection of both sliced veneer and lumber from which to choose, St-Raymond Veneers has a tremendous inventory of domestic species—from cherry, maple and red oak to hickory, cedar and walnut—as well as more exotic species such as khaya and sapele, so you can enjoy the quality and convenience of immediate shipment on many products.

SEE WHAT WE CAN DO FOR YOU.

CUSTOM PANELS BUILT TO YOUR SPECIFICATIONS

The Inventors of
ApplePly®

**Pick Your
Substrate**

**Select Your
Veneer**

**Choose Your
Finish**

**Specify
Machining**

States Industries invented ApplePly® and we do a whole lot more, too. With our unique capabilities in panel manufacturing, you can specify every detail of your custom hardwood plywood to create the perfect panel for your next project. Additional options include NOVA flat line finishing and component manufacturing.

Specified by you. Built for you.

Warm Natural Beauty | Sustainably Sourced | Safe | Legal

The Decorative Hardwoods Association (DHA) began its second century in 2022. This directory of our members describes our diverse membership of North American hardwood plywood, engineered wood flooring, and hardwood veneer manufacturers and suppliers. Now is a great time to be a member of DHA. We are advertising decorative hardwoods directly to consumers and the design community and defending the definition of “real wood.” If you are not yet a member and your company manufactures, supplies, or distributes decorative hardwoods, learn more about the benefits of [becoming a DHA member on our website](#) or contact DHA President, Keith Christman, at kchristman@decorativehardwoods.org.

This 2025 edition of *Where to Buy* showcases all of our members and their products, including their locations and contact information. This award-winning directory makes it easy to specify and purchase American-made products, certified to American standards. These American engineered hardwood products are the natural, beautiful choice that you can trust.

Our 15,000-square-foot state-of-the-art testing facility and association office is located in Sterling, VA, next to Dulles International Airport. Capital Testing and Certification Services, which offers technical services to our members and to nonmembers, continues to be the recognized expert in engineered hardwood products and other building and consumer products. Our lab provides a wide range of fire, physical property, and formaldehyde testing and certification.

Our website continues to set new records for the number of visitors each year. The biweekly *eNews* reaches more than 10,000

readers with diverse, pertinent news tailored for our industry and its customers. DHA sponsors three national consensus standards: the newly revised standard for hardwood plywood (*ANSI/HPVA HP-1-2024*), the standard for engineered wood flooring (*ANSI/HPVA EF 2020*), and a due diligence management system for sourcing legal timber (*ANSI LTDD 2.0 2023*). DHA also launched a continuing education program that has been completed by more than 3,250 architects and designers.

In addition, DHA believes in maintaining the integrity of products marketed as wood. We have successfully pursued challenges against the misleading marketing of fake products that claim to be wood but are merely laminated paper or plastic.

If you are looking for natural and amazingly beautiful products that have stood the test of time—and [deliver climate benefits](#), you have come to the right place.

Kyle Evans
Mullican Flooring

Experience
custom
hardwood
plywood as
unique as you

At Birchland, tradition meets innovation. We are a fifth-generation family business, carrying an 80-year legacy of knowledge and experience in producing hardwood plywood and veneer.

Our specialty lies in our extensive collection of over 100 natural and engineered veneers, all meticulously spliced in-house. Whether you're drawn to the timeless elegance of natural wood or the consistency of engineered veneers, we've got you covered.

We offer versatility like no other with thicknesses ranging from 1/8" to 2", and sizes up to 5'x 12'.

CUT/MADE-TO-SIZE HARDWOOD PLYWOOD

Photo of Funtime Cabinet Factory cabinetry made with Columbia Forest Products' hardwood plywood. Photo courtesy of Funtime Cabinet Factory and Columbia Forest Products.

Hardwood plywood cut-to-size and made-to-size by the manufacturer is used for furniture, cabinet components, and specialty products.

- Versatile – a variety of shapes and sizes available.
- Can be machined to meet customer needs.
- Eliminates the need to purchase and maintain expensive machinery.
- Reduces waste, inventory, and labor costs.
- Simplifies just-in-time sourcing.
- Customized product increases efficiency and yield.

FACTS ABOUT DECORATIVE HARDWOOD VENEERS

TYPES OF VENEER CUTS

Depending on the manner in which a log is cut, strikingly different visual effects can be achieved with the wood's grain and characteristics. This is the beauty of working with hardwood veneer - that two logs of the same species, cut in different ways, produce distinctive, individual veneers! Six principal methods of cutting veneer are used: rotary, quarter slicing, plain slicing, rift-cut, half-round slicing and lengthwise slicing.

Rotary

Rotary veneer is produced by centering the log in a lathe and turning it against a broad cutting knife which is set into the log at a slight angle. Rotary cut veneer can be sufficiently wide to provide full sheet (one piece) faces.

Quarter Slicing

Quarter sliced veneer achieves a straight grain appearance by slicing approximately perpendicular to the annual growth rings.

Plain Slicing

Plain sliced veneer is veneer sliced parallel to the center of the log to achieve flat-cut veneer. The cathedrals are formed by the inner most growth rings as the veneer is cut through the flitch.

Rift-Cut

Rift-cut veneer is produced from the various species of oak. Oak has medullary ray cells which radiate from the center of the log like the curved spokes of a wheel. This straight grain cut is at a slight angle to the medullary rays to minimize ray fleck (flake).

Half-Round Slicing

Half-round slicing is cutting on an arch roughly parallel to the center of the log to achieve flat-cut veneer. The cathedrals can have more rounded tops since the grain is formed by the inner most growth rings as the veneer is cut through the flitch.

Lengthwise Slicing

A board of flat sawn lumber is passed flat over a stationary knife. As it passes, a sheet of veneer is sliced from the bottom of the board. This produces a variegated figure.

Figure Characteristics of Veneers

The figure of the face veneer is of the utmost importance to the designer and architect, because the whole character of the completed installation may be determined by the choice of veneer to be used. When discussing figure in wood, those who deal with veneer usually describe the characteristics of the "movement" in the wood - whether it has wide or narrow heart, cathedral, crossfire, or is highly figured. Some of the more commonly used veneers are illustrated below.

Cherry,
American Black

Elm,
Carpathian Burl

Maple,
Hard

Oak,
Rift-Cut

Walnut,
Quartered

Our thanks to Sieling and Jones, Inc. for the photographs of veneer.

ENGINEERED HARDWOOD FLOORING

Photo of engineered hardwood flooring courtesy of AHF Products.

- Easy to install and maintain.
- Economical solution for renovating areas or replacing existing flooring.
- Adds warmth and beauty to any room.
- Dimensionally stable.
- Tight tolerances for consistent fit.
- Engineered for strength and stability.

PREFINISHED HARDWOOD PLYWOOD

Photo of cabinetry built with Murphy Company's hardwood products courtesy of Showplace Cabinetry and Murphy Company.

**Hardwood plywood that is factory finished by the manufacturer.
Available in various veneer species, colors, overlays, finishes, and patterns.
For retail and industrial applications.**

- Consistent quality.
- Strong and dimensionally stable.
- Available in thicknesses from 1/10" to over 2".
- Lowers finish cost.
- Extremely durable.

HARDWOOD PLYWOOD STOCK PANELS

Photo of interactive play area in The Bay Area Discovery Museum created with Columbia Forest Products' PureBond® MPX® formaldehyde-free interior panels. Photographer: Matthew Millman. Photo courtesy of Columbia Forest Products.

Hardwood plywood stock panels are manufactured in standard sizes such as 4' x 8' or 4' x 10' and are commonly 1/4" to 3/4" in thickness. Stock panels are available through distribution centers for industrial users or through mass merchandisers for commercial and do-it-yourself customers. Frequently cut to component size by the end user.

- Consistent quality.
- Diverse selection of species.
- Strong and dimensionally stable.
- A variety of cores: veneer, MDF, particleboard, lumber, and combination core.
- Can be obtained finished.

MANUFACTURERS OF HARDWOOD PLYWOOD STOCK PANELS**SPECIES:** R-Rotary, H-Half Round, P-Plain Sliced, Q-Quarter Sliced, I-Rift Cut**GLUE TYPES:** Exterior - Technical; Exterior - Type I; Interior - Type II; NAF – No Added Formaldehyde Exempt; ULEF – Ultra Low-Emitting Formaldehyde Exempt; Phenolic – Phenol Formaldehyde; PVA – Polyvinyl Acetate**CAPITAL TESTING CERTIFICATIONS:** EPA TSCA Title VI; CARB; ANSI/HPVA HP-1

EXPERTS IN TESTING & CERTIFICATION SINCE 1954

Since 1954, Decorative Hardwoods Association members have consistently chosen Capital Testing as their preferred provider of testing and certification. Capital Testing is proud to certify these DHA members in 2025:

CARB 93120 ATCM / EPA TSCA Title VI Formaldehyde Emissions

- AHF Products
- Birchland Plywood
- Cahaba Veneer and Plywood
- Chesterfield Wood Products
- Columbia Forest Products
- Commonwealth Plywood
- Darlington Veneer Co.
- Eastern Panel Manufacturing
- From The Forest
- GL Veneer Co.
- Great Lakes Veneer
- Howell Hardwood Flooring
- Husky Plywood
- Manthei Wood Products
- Mullican Flooring
- Murphy Plywood
- Rockshield Engineered Wood Products
- Roseburg Forest Products (Riddle, OR)
- States Industries
- The Wood Gallery
- Timber Products

ANSI/HPVA HP-1 Decorative & Hardwood Plywood

- Murphy Plywood
- States Industries

ANS LTDD: Legal Timber Due Diligence

- Danzer North America
- Veneer Technologies Inc.

ASTM E84 Flame Spread

- Murphy Plywood
- States Industries

ROTARY HARDWOOD VENEERS

Photo of the renovation of the executive dean's office at the Parsons School of Design featuring furniture made with Columbia Forest Products' PureBond® plywood. Photographer: Martin Seck. Photo courtesy of Columbia Forest Products.

- The grain pattern varies from log to log, making each piece its own natural unique piece of art.
- Wide variety of species available.
- Maximizes the usable veneer taken from each tree.
- Ability to select a specific flitch or "look."
- By using hardwood veneer, you honor centuries of craftsman heritage and contribute to an environmentally responsible use of a natural resource.

For more information, read: *Facts About Decorative Veneers* listed in the Table of Contents.

DECORATIVE HARDWOODS AssociationSM

RESOURCES

Looking for a copy of the national consensus standards for hardwood and decorative plywood or engineered wood flooring, or want comprehensive training for your team? DHA is committed to making it easier to do business with easy-to-download resources, many of which are free.

AMERICAN NATIONAL STANDARD

FOR HARDWOOD AND
DECORATIVE PLYWOOD

American National Standard for Hardwood and Decorative Plywood, ANSI/HPVA HP-1-2024

Requirements for face, back, and inner ply grades plus formaldehyde emissions, moisture content, tolerances, and more.

AMERICAN NATIONAL STANDARD

FOR ENGINEERED WOOD FLOORING

APPROVED AUGUST 14, 2020

American National Standard for Engineered Wood Flooring, ANSI/HPVA EF 2020

Grade descriptions, test procedures, and requirements for veneer thickness, machining, moisture content, and finishing.

American National Standard for Due Diligence in Procuring/ Sourcing Legal Timber ANSI LTDD 2.0 2023

Guidelines for creating and managing a quality assurance program to exclude illegal timber from the supply chain.

Hardwood Plywood, Engineered Wood Flooring & Hardwood Veneer: The Basics

An AIA-accredited introduction to hardwood plywood, engineered wood flooring, and hardwood veneer. Qualifies for one AIA LU/HSW hour.

Hardwood Plywood, Engineered Wood Flooring & Hardwood Veneer: The Specifics

An AIA-accredited course on the types of hardwood plywood and veneer and how they are manufactured. Qualifies for one AIA LU elective hour.

GRADING WORKSHOP SESSIONS

Grading Workshop Sessions

This comprehensive course on decorative hardwood plywood includes product construction, standards, species, grades, and much more.

AssociationSM

DHA MISSION

The mission of the Decorative Hardwoods Association, formerly known as the Hardwood Plywood & Veneer Association®, is to promote and support high quality, sustainably and legally produced decorative engineered wood products and hardwood veneer manufactured in North America.

OUR CORE VALUES

- Our unique strength is our depth and breadth of technical expertise in engineered hardwoods
- Our marketing of North American-produced engineered hardwoods drives consumer preference
- The Decorative Hardwoods Association is the single voice of our industry, advocating for a fair market and level playing field
- We actively collaborate to promote the sustainable management of forest resources and access to legally sourced timber
- Our national consensus standards for hardwood plywood, engineered wood flooring, and due diligence for sourcing legal timber are recognized and specified by producers and consumers

SPLICED HARDWOOD VENEERS

Photo of curved benches at 8 Bishopsgate in London built with Danzer 3D-Veneer. Ceiling is made of Danzer Veneer. Photographer: Dirk Lindner. Photo courtesy of Danzer.

- Environmentally friendly.
- Made to standards agreed upon between buyer and seller – grade, craftsmanship, etc.
- Continuity from order to order.
- Cost control.

For more information, read *Facts About Decorative Veneers* listed in the Table of Contents.

ARCLIN (M)

Arclync is the new suite of high performance surfacing solutions provided by Arclin. One of the products under this brand is Crystal, a high performance dry finish application for hardwood plywood. It provides a clear finish solution that can be smooth or textured while providing high levels of scratch and wear resistance. This surface also performs as a moisture protection layer and protects the wood against surface stains while making it very easy to clean. Crystal also provides UV protection as part of the integrated solution. Arclin is the North American leader in treating technologies, surfacing solutions, resins and adhesives systems for plywood and other wood substrates. With 12 locations across North America we focus on providing great service to our domestic and international markets. Our strategically located technology application laboratories in both the West and East Coast bring us closer to the different markets. Arclin designs and engineers tailor-made solutions for each individual application. Arclin fosters partnerships focused on market growth by providing new market opportunities for our customers.

GRENZEBACH CORP. (M)

Grenzebach offers veneer manufacturers the entire range of plants and machines for veneer drying, from individual dryers with manual feeders to complete veneer drying lines with scanners and stackers. Grenzebach is a specialist in high-quality veneer production and has realized more than 400 plants worldwide. In-depth expertise regarding different veneer types provides customers with an individual fine-tuning of the technology to their requirements. The technologies and services are based on 130 years of experience in efficient raw material processing, which can be traced back to Schilde AG and Babcock BSH, now operating as Grenzebach. They supply complete processing lines to the veneer industry with standard roller dryers, press dryers, belt dryers, sinus belt dryers, feeding systems, unloading systems, stackers, slicers, scanners, and custom AGV transport systems. Furthermore, Grenzebach also specializes in the production of high-grade insulation materials such as flexible wood fiber insulation batts. The first plant was commissioned more than 30 years ago. As a full-service partner, Grenzebach supports its customers with profound know-how and expertise throughout the equipment's entire lifecycle and is serving the North American wood industry since 1988.

SUPPLIER MANUFACTURERS (M) AND DISTRIBUTORS (D)**P-Plywood V-Veneer O-Other****MEINAN MACHINERY WORKS, INC. (M)**

Meinan develops and manufactures innovative machinery for veneer and plywood production, holding hundreds of worldwide patents. The basic concept of peeling veneer was improved by the revolutionary Meinan lathe, using spiked disks to drive logs on their circumference, providing better veneer quality, higher yield, and extremely close thickness tolerance. The Meinan lathe is part of an automatic veneer peeling line with significant labor cost savings, featuring the world's first in-line green veneer composers to reduce labor costs and improve dryer utilization. Meinan's newest development is the 8' green veneer composer, installed in-line to automate the green chain. Meinan also manufactures scarf composers, grading systems, automatic layup lines, and sanders.

PREMIERE FINISHING & COATING (M)

Premiere Finishing & Coating has expanded its capabilities in a major way beyond its Flat Line floor finishing equipment with the installation of two new production lines. The new Makor reciprocating Spray Line / Oven combination can handle just about anything we throw at it - cabinets, cabinet parts, doors, frames, moldings, and anything that doesn't fit on the Flat Line. It is versatile and perfect for any 3D spray requirement, large or small. The UV Panel Line can finish clear, stained, opaque, and primed - we can match any color and finish. It has 6 roll coaters, a filler machine, Miltec UV lights, denibbers, and an in-line sealer sander. Now more than ever, if you can dream it, we can finish it.

SPECIALTY ORGANICS, INC. (M)

Specialty Organics is a diversified American chemical company. Our BreezeBond™ adhesive is the most-advanced plant-based hot-press adhesive technology available today. Going beyond existing plant-based adhesive technology, this water-based product utilizes an abundant inorganic cross-linker. Not only is this product formaldehyde-free, BreezeBond™ also contains no harmful petrochemicals. This complaisant shelf-life product meets industry wet bond strength standards for indoor plywood applications with its attributes having been verified by independent third-party laboratories. This adhesive is ideal for furniture, cabinetry components, as well as decorative accent panels. It is price-competitive with traditional hot-press adhesives on the market today and requires minimal capital investment to begin using. BreezeBond™ is made in the USA and is not directly affected by volatile oil markets because its main ingredient is soy flour. It can also be effectively used as an extender, blending well with other water-based hot-press adhesives to reduce the cost of other forest product applications such as particleboard and decorative overlays/veneers.

Enabling Engineered Wood Products

Innovative Solutions for the Engineered Wood Products Industry.

Hexion is a world leader in supplying resins, adhesives, wax emulsions, and ancillary products to the engineered wood and hardwood veneer products industries. We meet the most challenging applications with a complete package of innovative, cost-effective solutions. We're also at the forefront in developing environmentally suitable technologies for reduced emissions.

Product Lines

- Urea Resins
- Melamine Resins
- Phenolic Resins
- Phenol-Resorcinol Resins
- PVA Adhesives –Conventional and Cross Link
- Casein Adhesive
- EcoBind™ Ultra-low Emitting Resin and Adhesive Technologies
- EPI Adhesive
- HRA Technology (Heat Rated Adhesives)

Applications

- Veneer Splicing
- Composite
- Panels
- Hardwood Plywood
- Furniture
- Laminating
- Saturating
- All Woodworking Applications
- Fingerjointing – Structure and Non-structural Adhesives
